

## Vacancies: Asbestos Consultants - Nationwide

We are seeking experienced asbestos consultants with excellent communication skills, keen eye for detail and a positive attitudes to join our asbestos consultancy team. We have opportunities available in a number or regions nationwide.

The successful applicants will need to be able to carry out a full range of consultancy services, to include all types of survey, supervision of removal contracts and associated clearance work, preparation and technical review of reports.

The consultant must have demonstrable experience within the asbestos field.

Reporting to the Operations Manager, the roles available are full time positions which support our national operations.

Current recognised qualifications which will be accepted include;

- P402, P403 & P404
- BOHS Certificate of Competence in Asbestos (CoCA/CCP)
- The Royal Society for Public Health (RSPH) Level 3 Certificate in Asbestos Inspection Surveying & RSPH Level 3 Certificate for Asbestos Air Monitoring Analysts

The key responsibilities of the consultant will include, but not be limited to the following:

- Asbestos surveys
- Bulk sampling and assessment
- Statutory re-inspection
- Airborne fibre monitoring, fibre counting and clearance works
- High level consultancy, client advice on managing asbestos in estates and properties
- Maintaining skills sets on the asbestos skills matrix
- Ensure that all asbestos related work is carried out in accordance with company Asbestos Quality and Procedures Manual (AQPM) and associated documentation.
- To ensure the technical compliance of all work that is carried out and to liaise closely with the Technical Director, Technical Manager, Quality Manager and Technical Auditors.
- To comply with the Company General Quality Procedures with support from the Quality Manager.
- To provide quality services and information to clients, must have knowledge of all current Asbestos, health and safety and CDM regulations.
- Attend operational team meetings as and when required.
- Ensure that reports are completed in accordance with timescales set and to the required standard.
- Ensure that the duties of the Site Laboratory UQM are implemented as required.
- Participate in the internal and external audit programme for fibre counting, bulk sampling (if approved), surveying and airborne fibre monitoring as required.
- Compile recommendations and technically review reports as necessary.

- To be alert to business opportunities and promote the services of the group, identify inter-company sales opportunities and pass leads
- Implementation and monitoring of safety procedures and statutory safety requirements on the sites to which you control.
- Provide technical advice as and when required
- Attend training courses as and when required
- Prepare health and safety risk assessment and ensure project staff adhere to the assessment.
- To carry out any other duties required as part of the overall strategy to achieve the company's objectives.

If you would like to join a fast growing and ambitious organisation and believe you have the skills and attributes we are looking for, please apply with a CV and covering letter for consideration. It should be noted that applications received without either a covering letter or CV being included will be rejected.

Job Type: Full-time
